

PACKAGING.  
IDEAS.  
BOTH.

WEBER

The history of Weber Packaging began almost thirty years ago with an innovative foil range.

Brothers and Managing Directors Michael und Stephan Weber (right) are the second generation to manage the business.

## ABOUT US

Second generation expertise. What makes life interesting? Those great and small moments which give us the feeling to be in the middle of life, not on the sidelines. Of course we at Weber Packaging cannot change your life - or that of your customers. But we can help to package those great and small moments as pleasantly and practically as possible.

We have been selling packaging for over three decades. Right from the start, when we began with a new foil range, we developed specific solutions for the food

industry. And that hasn't changed to this day. You will find everything connected with food packaging or applied industry solutions in our range. How did we manage it? By working closely with our partners, wholesalers and in direct distribution as well as a logistics system which also covers neighbouring countries. Our claim today remains the same: to be so competent that we can always find the best solution for our customers.

We have around 3,500 items in our range which are continuously updated.

Our products are refined continuously thanks to close communication with our manufacturers.

Room for creativity: Do you want your company logo printed on our products? No problem. We will show you what can be done.

## OUR SERVICES YOUR BENEFIT

More than just a comprehensive range. We think and act in a holistic manner. Of course, any company can say that. But we practise what we preach. You will see this in practice when we advise you about having your logo printed, in the integration of international trends in our range which comprises 3,500 items. We will carry out a project for you including planning, design and timely delivery - no matter whether it is a standard order or a special product for a specific market.

You will attract new customer groups with us. What will

you gain from working with Weber Packaging? Time and new customers. You have enough to do with your daily work. We can relieve you of some of the burden by advising you professionally. We can help you to optimise your packaging needs and applications and benefit from the latest developments in the food industry. Utilise our expertise, our experience and our products which your customers are demanding more of each day.

We can do the planning, the design and ensure timely execution of your projects.

A logical solution: We can deliver quickly and on time from our modern warehouse facility both nationwide and to neighbouring countries.

## SERVICE

Quick, up to date and reliable. But we don't stop with the order. We continue to look after you after your order is delivered. Others might call that service, we call it the most natural thing in the world. That means that our employees advise you on site or you can choose to gather information about new products and innovations yourself - for example via the internet and at [www.weber-packaging.de](http://www.weber-packaging.de). Our shipping department delivers Weber products to your premises quickly, simply and reliably. And then? We continue to look after you.

For example, we offer storage for your foodstuff packaging on an on-call basis. The advantage for you: You don't have to lease expensive warehouse space, you can pick up or have the exact quantity delivered that you need - and you will be notified by us when you need to restock your depot. This means you can avoid the embarrassing situation of running out of packaging for your customers.

## ADDITIONAL PRODUCTS

Our professional helpers. In addition to packaging with sophisticated material properties for your foodstuffs, our range also includes machines. These high-quality machines will professionalise your work. We can help you to find the right

product for your needs, select the right materials and install it at your premises. We will explain how the machine works in detail - and will also service it professionally.

## OUR GOAL

Transparency and success. We are often asked what we aim for in our work. The answer is very simple: "We are not satisfied until you are!"

This was our core philosophy when the company was founded. And this sentence will continue to define our work in the coming years. We know that transparency and success are the basis for sustained cooperation. And that is what we are aiming for.
